About the Data and the Index

Community Development Initiatives at ASU created the Seniors of San Angelo Social Health Index to help evaluate the quality of life for elders in different San Angelo neighborhoods. The evaluation includes 15 indicators based on data from the U.S. Census Bureau's American Community Survey. The neighborhood level data are 2011-2015 five year averages on items describing housing and neighborhood attributes, income and education statistics, and social isolation among elder residents in San Angelo's 20 census tracts. The 15 indicators are:

- **Neighborhood and Housing Indicators**
 - ❖ Percent households with an age 60 or over member
 - ❖ Percent homeowners who are age 65 or over
 - ❖ Percent senior householders with housing costs 30% or more of income
 - ❖ Senior median household income as a percent of neighborhood median
 - ❖ Grandparents age 60 & over with responsibility for grandchildren
- **Income and Education Indicators**
 - ❖ Senior poverty rate
 - ❖ Senior labor force participation rate
 - ❖ Average social security & retirement income as a percent of citywide average
 - ❖ Percent households with a member age 60 or over that receive food stamps
 - ❖ Percent seniors with high school or more education
- **Social Isolation Indicators**
 - ❖ Residential Isolation: Percent seniors living alone or in group quarters
 - ❖ Vehicle Isolation: Percent senior households with no vehicle
 - ❖ Language Isolation: Percent seniors not speaking English well
 - ❖ Disability Isolation: Percent seniors with a disability
 - ❖ Marital Isolation: Percent seniors widowed, divorced, separated, never married

The Neighborhoods

The Seniors of San Angelo Social Health Index compares 20 census tracts in the city that correspond to different neighborhoods. The following map depicts the neighborhoods.

Summary Table

The Index uses a 0 to 100 point scale to compare the city's neighborhoods. Higher scores indicate parts of San Angelo where seniors enjoy a higher quality of life. The Seniors Social Health Index summary score is based on all 15 indicators average determining each neighborhoods rank.

Neighborhoods	Census Tract	Seniors Social Health Index (15 Indicators)	Rank	Neighborhood & Housing Indicators (5)	Income & Education Indicators (5)	Social Isolation Indicators (5)
Riverside	1	59	8	51	62	65

Neighborhood Tables

The following tables depict the Seniors of San Angelo Social Health Index results for each neighborhood by Census Tract, beginning with Tract 1 - Riverside.

Riverside (Tract 1)	Rank	Neighborhood	City	Neighborhood Score*	City Score*
Seniors of San Angelo Social Health Index (15 Indicators)	8			59	54
Neighborhood & Housing Indicators (5)				51	42
Percent households with an age 60 or over member		38.2%	35.5%	41	32
Percent homeowners who are age 65 or over		33.7%	31.0%	45	37
Percent senior householders with housing costs 30% or more of Income		18.9%	29.0%	85	56
Senior median household income as a percent of neighborhood median		69.2%	79.5%	22	39
Grandparents age 60 & over with responsibility for grandchildren		39.7%	53.1%	60	47
Income & Education Indicators (5)				62	63
Senior poverty rate		1.7%	11.2%	99	71
Senior labor force participation rate		19.2%	17.4%	65	71
Average social security & retirement income as a percent of citywide average		90.7%	100.0%	34	45
Percent households with age 60 & over members that receive food stamps		9.8%	10.2%	67	66
Percent seniors with high school education or more		67.4%	78.6%	44	64
Social Isolation Indicators (5)				65	57
Residential Isolation: percent seniors living alone or in group quarters		21.3%	32.8%	85	60
Vehicle Isolation: percent senior households with no vehicle		2.1%	10.3%	94	68
Language Isolation: percent seniors not speaking English well		6.2%	4.2%	62	74
Disability Isolation: percent seniors with a disability		45.1%	39.2%	20	33
Marital Isolation: percent seniors widowed, divorced, separated, never married		40.8%	47.0%	64	50
*The neighborhood and city scores are based on a 0-100 point scale. The most positive outcome for each indicator is assigned a score of 100, and the least positive result is assigned a zero. Other neighborhoods get scores reflecting their place between the most positive (100 points) and the least positive (0 points). The individual indicator scores are averaged to get the scores for the groups. Each neighborhood's rank is determined by its average for all 15 indicators.
